01

ABOUT ME

Passionate about LEGO Technic since early childhood, after a degree in mechanical engineering and a 10-year career in the industrial sector, I started my own business in 2020 to conceive and build LEGO Technic models.

My workshop, located near Annecy (France), is where I create bespoke models upon customers' requests or my own ideas that I then commercialise under my artist name: "Nico71".

My creations are primarily vehicles and machinery, most often with dynamic functions. As long as the challenge involves engineering, I find myself curious and motivated!

WHAT I OFFER

ASSEMBLY INSTRUCTIONS

READY-TO-BUILD KITS

PARTS, STICKERS ET INSTRUCTIONS

CUSTOM-MADE CREATIONS

Online catalogue:

www.nico71.fr/shop/

07

CUSTOM-MADE

CREATIONS

If you are looking for something extra-special that is not available in the catalogue, I can create a bespoke model to your specific tastes and wants. To do so, we will determine the following aspects during our first exchange :

- *The model to reproduce (Maker/model/version)*
- *The size or scale*
- *The main color*
- *The specific functions (motorisation, moveable parts, etc.)*
- *The specific details (color, logo, etc.)*
- *If the model should be delivered built or ready-to-build (Parts provided by our Spanish partner)*
- *If the model requires assembly instructions*
- *The quantity to produce if the models are delivered as ready-to-build kits*
- *The time frame if you order for a specific event*

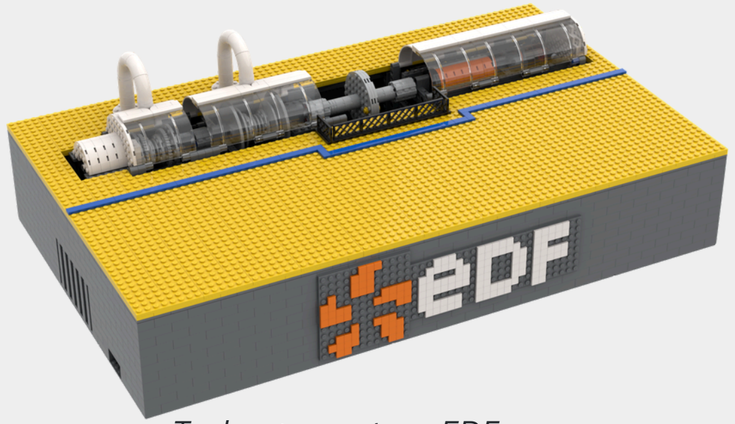

08

CUSTOM-MADE CREATIONS

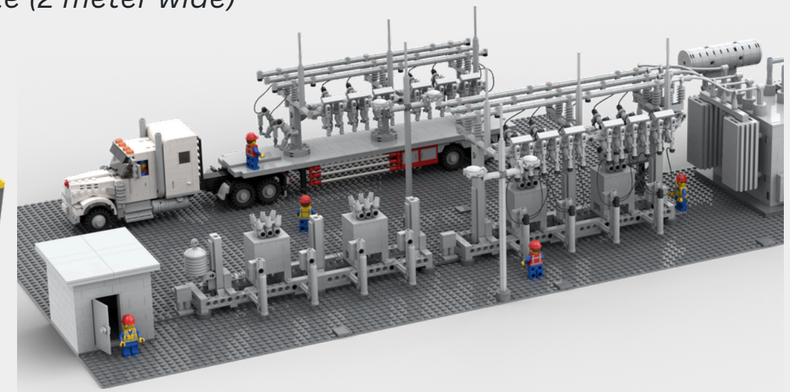

Example : industrial machinery and product replicas

Airbus satellite (2 meter wide)

Turbo generator - EDF

Electrical installation

Industrial air conditionner

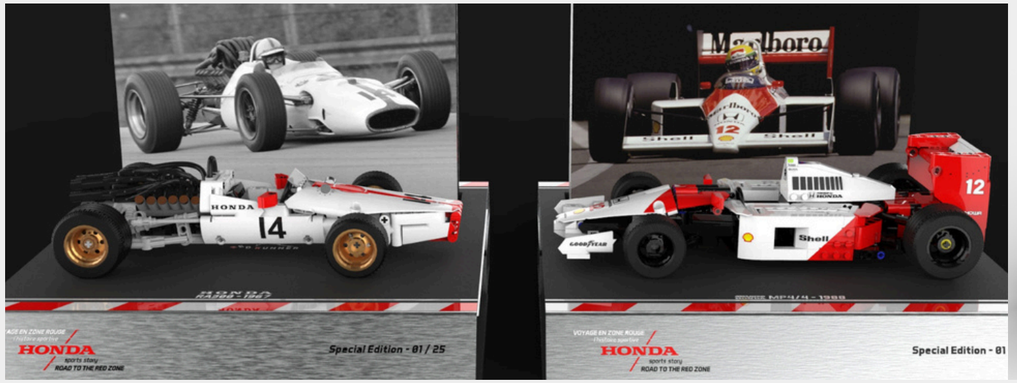

Drilling installation(1 meter tall)

09

CUSTOM-MADE CREATIONS

Example : The vehicules

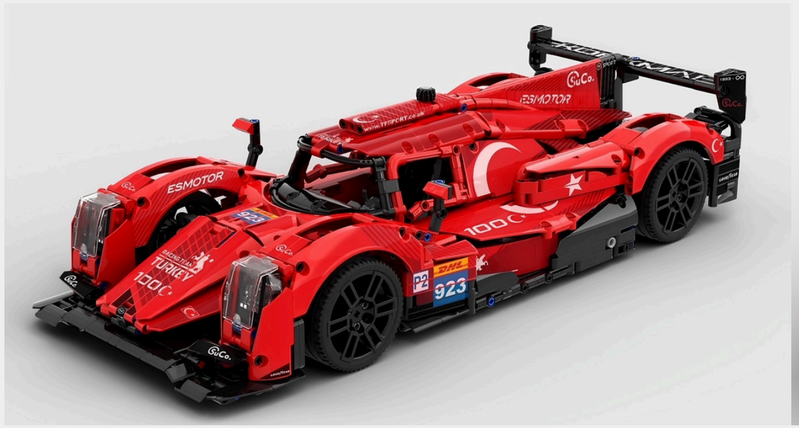

Honda MP44 et RA300

Tractor with trailer Deutz

Porteur Volvo

LMP2 Oreca 07

Muscle Car

Seismic research truck

PRICES (VAT INCLUDED)

ASSEMBLY INSTRUCTIONS

Digital - PDF
no parts

10 TO 20€

READY-TO-BUILD KITS

ON CATALOGUE

Parts, stickers and instructions (PDF)
